

A simple dude aiming to create cool stuff -

What I'm looking for

The opportunity to create beautiful and user-friendly solutions that serve a purpose. I'm always seeking opportunities to expand and utilize my skills as a multimediadesigner and web developer.

What I've done

Green Water - Design, Development, and Illustration

January 2017 - June 2017

I was involved in all aspects of the product, from brainstorming, research, documentation, and ideation, to designing, testing, and illustrating, as well as setting up the final website in Wordpress. A unique flyer design was also created, using the same isometric artstyle created for the brand. An extensive report was also written, and I found myself wearing many different hats during this project.

DXTR Tactile - App mockups for IOS tablet and phones

January 2017 - June 2017

I was responsible for the initial visual design and UI/UX for a parents app, running on both IOS tablets and phones. The app included amongst other things, chat features, a microtransaction store and statistics about a child's development and learning patterns with helpers to improve in a non condescending way.

SAAB Denmark - User-login design, testing, and development

November 2016 - December 2016

I was in charge of designing, testing, and developing a sign-in system, including a welcoming and friendly interface design that follows SAAB's current visual design guidelines, tested to guide the user with visuals and a hierarchy to improve the end experience. A safety instructions animation video was also a part of the system. An employee- and a user-panel was created for the project.

Things I know

HTML/CSS, Adobe Creative Suite CC, PHP, JavaScript, Wordpress, Scrum, Wireframing, User Testing, Prototyping, Communication, Illustration

Where I learned

2017 - PRESENT Professionsbachelor i Web udvikling - EAAA
2015 - 2017 Multimediedesign AP - EASV Sønderborg
2012 - 2015 Kommunikation & IT - HTX Sønderborg
